

The Red Armistice Proposal
To the New York Herald Tribune:
It is evident that the Communists are at the breaking point in Korea now, or else Soviet Chief Malik would not sue for armistice. The thing to do is to continue to give the Communists in Korea the works the Allied fire-power was delivering, until the poor and illiterate Chinese peasants realize that the Communist spell binders were lying to them about the American "imperialists," and surrender in mass just like the Korean Communists did last fall.
Or else the 500,000,000 Chinese under the dictatorial control of Mao, with Stalin's assist, will continue to fight and invade, if not Korea, then Indo-China, the Philippines, Formosa, Japan and eventually the United States and Canada, armistice or no armistice.
The Communist control over China must be broken, and now is the best time, before the Commies acquire good atomic bombs and plenty of them. But it must be done primarily, not by our boys, but by the Chinese anti-Communists of Formosa and their guerrillas on the Chinese mainland who are anxious to fight for freedom now because they have already had a foretaste of Communist misrule and slavery.
